

THE WEDGE

Fits all standard gutters with minimum 2.7" (7 CM) width.

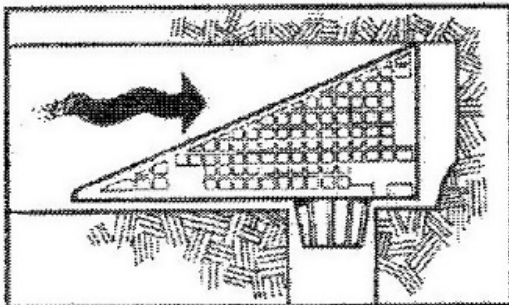

Downspout Screens.

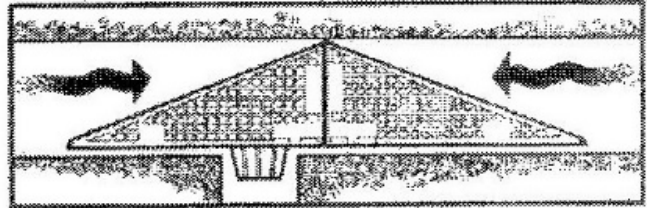

1. Fold the sides down; snap to bottom.

2. Fold end down: snap to sides and bottom. Prior to installation, remove all debris from your entire gutter and downspout system.

3. Place the **WEDGE** in the gutter with the oval ring in the downspout opening, pointing with sloped end facing the oncoming water.

- If the water flows to your downspout from two directions, use two **WEDGES**. Simply remove the oval ring from one **WEDGE**. The twists off connectors are provided on the bottom edge of both units. Assemble as directed - see steps #1 and #2. Connect both **WEDGES** back to back.

- The **WEDGE** Downspout Screen is the most effective way to keep your rain gutter downspouts clear of leaves and debris.

- For the best results, use the **WEDGE** Downspout Screen in every downspout of your entire rain gutter & downspout system.

Model # W-103 Made in the U.S.A.

US Patent # 5,536,406
